Littoral Combat Ship (LCS) Mine Counter Measures (MCM) Mission Modules

Fairlead was responsible for all Manufacturing & Integration of the LCS MCM Mission Modules, as a first tier subcontractor to Northrop Grumman Corporation.

The LCS Mine Counter-Measure module is comprised of five different Mission Modules that consist of low-weight, high-strength steel containers that store, restrain, and house high precision electronic sensors and equipment used in the various ship missions.

Module types:

- AN/AQS-20A Underwater Towed Sonar
- Airborne Laser Mine Detection System (ALMDS)
- Organic Airborne Mine Counter Measures (OAMCM)
- Remote Mine-hunting System (RMS)
- Common Support Containers (CSC)

Fairlead outfitted containers with custom designed and manufactured aluminum equipment cradles, storage racks, articulating dollies and trays.
